Course Overview: In this intensive 24-hour training, law enforcement instructors will gain essential tools to enhance their training programs through scenario-based exercises. Whether you're an experienced instructor or new to the role, this course provides practical knowledge. Here's what the program covers:

Teaching Methods:

- Explore effective instructional techniques for scenario-based training.
- Understand how to engage and motivate students during practical exercises.

Scenario Forms and Design:

- Learn how to structure scenarios for maximum realism and learning impact.
- Discuss creating scenarios that align with specific training objectives.

Interacting with Students:

- Master communication skills when facilitating scenarios.
- Understand how to provide constructive feedback and encourage active participation.

Hands-On Scenario Structuring:

- Dive into practical exercises for building realistic scenarios.
- Explore variations (e.g., role-playing, force-on-force) to challenge officers.

Implementing Scenarios During Class:

- Discuss integrating scenarios seamlessly into existing training programs.
- Learn how to transition smoothly from classroom instruction to practical exercises.

Safety and Liability Considerations:

- Understand safety protocols to minimize risk during scenarios.
- Explore liability reduction strategies for both instructors and agencies.

Staff and Equipment Requirements:

- Address staffing needs for effective scenario-based training.
- Discuss equipment essentials (minimal cost, maximum impact).

Learning from Scenarios Gone Wrong:

- Analyze case studies where poorly designed scenarios led to negative outcomes.
- Learn from mistakes to improve future training.

Upon completion, instructors will receive an instructor tactical t-shirt, a certificate, and a 3-year certification. This knowledge will empower you to create a positive training environment that enhances officer skills and safety.
